

# SonicWall NSsp™ 15700 Datasheet

The SonicWall Network Security services platform™ (NSsp) 15700 is a next-generation firewall with high port density and multi-gig speed interfaces, that can process several million connections for zero-day and advanced threats. Designed for large enterprise, higher education, government agencies and MSSPs, it eliminates attacks in real time without slowing performance. It is designed to be highly reliable and deliver uninterrupted services to organizations.

## Enterprise-Class High-Speed Firewall

As businesses evolve along with an increase in managed and unmanaged devices, networks, cloud workloads, SaaS applications, users, Internet speeds, and encrypted connections, a firewall that can't support any one of these becomes a bottleneck in the IT landscape. A firewall should be a source of strength and not a point of weakness.

The SonicWall NSsp 15700's multiple 100G/40G/10G interfaces allow you to process several million simultaneous encrypted and unencrypted connections

with unparalleled threat prevention technology. With 70% of all sessions being encrypted, having a firewall that can process and examine this traffic without impacting the end user experience is critical to productivity and information security.

The NSsp 15700's unified policy interface enables organizations to simply and intuitively create access and security policies in a single unified interface.

## Simplified management and reporting

Ongoing management, monitoring and reporting of network activities are handled through the SonicWall Network Security Manager (pending). This provides an intuitive dashboard for managing firewall operations as well as provide historical reports – from a single source. Together, the simplified deployment and setup along with the ease of management enable organizations to lower their total cost of ownership and realize a high return on investment.

## SonicWall NSsp 15700 Benefits:

- High port density
- 100 GbE ports
- Multi-instance firewall
- Integrates with on-prem and cloud-based sandboxing
- Single pane of glass management through cloud or firewall
- Redundant power
- SonicOSX 7.0 support
- TLS 1.3 support
- Supports millions of simultaneous TLS connections
- Low TCO

## Deployment

### Next-Generation Firewall (NGFW)

- Managed through a single pane of glass
- NSsp 15700 integrates with the rest of the SonicWall ecosystem of solutions
- Gain full visibility into your network to see what applications, devices, and users are doing to enforce policies as well as eliminate threats and bandwidth bottlenecks
- Integrate with Capture ATP with RTDMI for cloud-based sandboxing or Capture Security appliance for on-premise malware detection

### Deep Packet Inspection of SSL/TLS (DPI-SSL) for hidden threats

- The NSsp 15700 provides inspection for over millions of simultaneous TLS/SSL and SSH encrypted connections regardless of port or protocol
- Inclusion and exclusion rules allow customization based on specific organizational compliance and/or legal requirements
- Support for TLS cipher suites up to TLS 1.3

### Segmentation and Networking

- Operate across several segmented networks, clouds, or service definitions, with unique templates, device groups, and policies across multiple devices and tenants
- MSSPs can also support multiple customers with a clean pipe along with unique policies

### Multi-Instance Firewall

- Multi-instance is the next generation of multi-tenancy
- Each tenant is isolated with dedicated compute resources to avoid resource starvation
- It features physical and logical ports/tenants
- It supports independent tenant policy and configuration management
- Leverage version independence and High Availability (HA) support for tenants

### Wire Mode Functionality

- Bypass Mode for the quick and relatively non-interruptive introduction of firewall hardware into a network
- Inspect Mode to extend Bypass Mode without functionally altering the low-risk, zero latency packet path
- Secure Mode to actively interposing the firewall's multi-core processors into the packet processing path
- Tap Mode to ingest a mirrored packet stream via a single switch port on the firewall, eliminating the need for physically intermediated insertion

### Advanced Threat Protection

- SonicWall Capture Advanced Threat Protection™ (ATP) is used by over 150,000 customers across the world through a variety of solutions and it helps to discover and stop over 1,200 new forms of malware each business day
- For compliance and performance-sensitive customers, the NSsp 15700 integrates with Capture Security appliance (CSa), a local device based on the memory-based file analysis technology, Real-Time Deep Memory Inspection™ (RTDMI)

### Capture Cloud Platform

- SonicWall's Capture Cloud Platform delivers cloud-based threat prevention and network management plus reporting and analytics for organizations of any size

### Content Filtering Services

- Compare requested web sites against a massive database in the cloud containing millions of rated URLs, IP addresses and web sites
- Create and apply policies that allow or deny access to sites based on individual or group identity, or by time of day, for over 50 pre-defined categories

### Intrusion Prevention System (IPS)

- Delivers a configurable, high performance Deep Packet Inspection engine for extended protection of key network services such as Web, e-mail, file transfer, Windows services and DNS
- Designed to protect against application vulnerabilities as well as worms, trojans, and peer-to-peer, spyware and backdoor exploits
- The extensible signature language provides proactive defense against newly discovered application and protocol vulnerabilities
- SonicWall IPS offloads the costly and time-consuming burden of maintaining and updating signatures for new attacks through SonicWall's industry-leading Distributed Enforcement Architecture (DEA)

### IoT and Application Control

- The NSsp 15700 catalogs thousands of applications through App Control and monitors their traffic for anomalous behavior through the on-board Application Firewall
- Segment managed from unmanaged devices with unique management and access profiles

## SonicOSX feature summary

### Firewall

- Stateful packet inspection
- Reassembly-Free Deep Packet Inspection
- DDoS attack protection (UDP/ICMP/SYN flood)
- IPv4/IPv6 support
- Biometric authentication for remote access
- DNS proxy
- REST APIs
- SonicWall Switch integration

### Unified Security Policy

- Unified Policy combines Layer 4 to Layer 7 rules:
  - Source/Destination IP/Port/Service
  - Application Control
  - CFS/Web Filtering
  - Single Pass Security Services enforcement
  - IPS/GAV/AS/Capture ATP
- Rule management:
  - Cloning
  - Shadow rule analysis
  - In-cell editing
  - Group editing
- Managing views
  - Used/un-used rules
  - Active/in-active rules
  - Sections

### TLS/SSL/SSH decryption and inspection

- TLS 1.3
- Deep packet inspection for TLS/SSL/SSH
- Inclusion/exclusion of objects, groups or hostnames
- SSL control
- Granular DPI-SSL controls per zone or rule
- Decryption Policies for SSL/TLS and SSH

### Capture advanced threat protection<sup>2</sup>

- Real-Time Deep Memory Inspection
- Cloud-based multi-engine analysis
- Virtualized sandboxing
- Hypervisor level analysis
- Full system emulation
- Broad file type examination
- Automated and manual submission
- Real-time threat intelligence updates
- Block until verdict
- Capture Client integration

### Intrusion prevention<sup>2</sup>

- Signature-based scanning
- Automatic signature updates
- Bi-directional inspection
- Granular IPS rule capability
- GeolP enforcement
- Botnet filtering with dynamic list
- Regular expression matching

### Anti-malware<sup>2</sup>

- Stream-based malware scanning
- Gateway antivirus
- Gateway anti-spyware
- Bi-directional inspection
- No file size limitation
- Cloud malware database

### Application identification<sup>2</sup>

- Application control
- Application bandwidth management
- Custom application signature creation
- Data leakage prevention
- Application reporting over NetFlow/IPFIX
- Comprehensive application signature database

### Traffic visualization and analytics

- User activity
- Application/bandwidth/threat usage
- Cloud-based analytics

### HTTP/HTTPS Web content filtering<sup>2</sup>

- URL filtering
- Proxy avoidance
- Keyword blocking
- Policy-based filtering (exclusion/inclusion)
- HTTP header insertion
- Bandwidth manage CFS rating categories
- Content Filtering Client

### VPN

- Auto-provision VPN
- IPSec VPN for site-to-site connectivity
- SSL VPN and IPSec client remote access
- Redundant VPN gateway
- Mobile Connect for iOS, Mac OS X, Windows, Chrome, Android and Kindle Fire
- Route-based VPN (OSPF, RIP, BGP)

### Networking

- Multi-instance architecture
- PortShield
- Jumbo frames
- Path MTU discovery
- Enhanced logging
- VLAN trunking
- Port mirroring
- Layer-2 QoS
- Port security
- Dynamic routing (RIP/OSPF/BGP)
- Policy-based routing (ToS/metric and ECMP)
- NAT
- DHCP server
- Bandwidth management
- Link aggregation<sup>1</sup> (static and dynamic)
- Port redundancy<sup>1</sup>
- A/P high availability with state sync
- A/A clustering<sup>1</sup>
- Inbound/outbound load balancing
- High availability - Active/Standby with state sync
- Wire/virtual wire mode, tap mode, NAT mode
- Asymmetric routing

### VoIP

- Granular QoS control
- Bandwidth management
- DPI for VoIP traffic
- H.323 gatekeeper and SIP proxy support

### Management and monitoring

- Web GUI
- Command line interface (CLI)
- Zero-Touch registration & provisioning
- SonicExpress mobile app support
- SNMPv2/v3
- Centralized management and reporting with SonicWall Global Management System (GMS)<sup>2</sup>
- Logging
- Netflow/IPFIX exporting
- Cloud-based configuration backup
- BlueCoat security analytics platform
- Application and bandwidth visualization
- IPv4 and IPv6 management

<sup>1</sup> Not supported on NSv Series firewalls

<sup>2</sup> Requires added subscription.

| Product                                                    | SKU         |
|------------------------------------------------------------|-------------|

| SONICWALL SFP+ 10GBASE-T TRANSCEIVER COPPER RJ45 MODULE   | 02-SSC-1874 |

## About SonicWall

SonicWall delivers Boundless Cybersecurity for the hyper-distributed era and a work reality where everyone is remote, mobile and insecure. By knowing the unknown, providing real-time visibility and enabling breakthrough economics, SonicWall closes the cybersecurity business gap for enterprises, governments and SMBs worldwide. For more information, visit [www.sonicwall.com](http://www.sonicwall.com)
